Subject: RE: DuPont Question (Time Sensitive)

There are none above the current PHA in Ohio that I am aware of.

Best wishes,
Heather

Lynn- Neither Vienna nor Parkersburg are above the current PHA. They (Vienna) would have all wells but one above the 70 ppt value based on the two confirmation rounds of sampling they've recently completed. Parkersburg has one well above the new HA.

Subject: DuPont Question (Time Sensitive)
Importance: High

Hi folks -

Prior to the Administrator briefing today at 3pm, our Office Director asked us whether there is a current ISE at or in the vicinity of the Washington Works Facility. At the in-person meeting with DuPont, we saw the Vienna data, which showed out of the 8 wells, only 2 had PFOA values under the expected HA. Are there current PFOA levels above 400 ppt (an ISE under the current order now) in Vienna or elsewhere?

Many thanks,
Lynne
